Reviewer: *General Dentistry.* 2007, 2008, 2009.

PERSONAL PHILOSOPHY

My goal is to educate my patients and colleagues about current concepts in dental medicine and to provide the best ethical advice and care possible for their individual situations. I intend to uphold honesty, integrity, and professionalism as key components of my overall persona and service to humanity. The ability to reach this goal comes from a solid and caring family and wife who support countless hours of out-of-house labor and continuing education. Understanding that my skills as an educator, as a scientist, and as a clinician are God-given gifts, I believe that it is my mission to uphold the ethical ideals of the profession of dentistry and to benefit the patients who it serves.
